

SAHETI SCHOOL

ΣΧΟΛΗ ΣΑΧΕΤΙ

THE HEADMASTER

cordially invites you to attend

the opening of the "Apostolos Haggiyannes Science Centre"

on Monday 6th June, 1988 at 7 for 7.30 p.m.

at Saheti School

Dress: Formal

R.S.V.P.

Headmaster's Secretary 53-6968/9/0

6/6/88
OPENING OF SCIENCE LABORATORY - SAHETI

~~Mr. Consul General, Mrs. Georgiou, Professor Gus Gerrens,;~~
Mr., & Mrs. Bizos,; Mr. & Mrs. Costa Tomazos,; our Principal -
Mr. Morgan Ellis,; Mr. Kokkoris - Chairman of the P.T.A.; parents,
friends of SAHETI.

Words fail one as a fellow Hellene in how to thank Mr. Tomazos for
this wonderful contribution - the Science laboratory for SAHETI
named after his grandfather - THE APOSTOLOS HAGGIYANNES SCIENCE CENTRE.

A wonderful and reputable school such as Saheti, was most definitely
incomplete without a Science Laboratory. The importance of this
Laboratory in the schooling of our children need not be ramified.

Saheti has become a very important organisation in the life of
Hellenes in South Africa. Although the immediate impact is in
the Witwatersrand, there is no doubt that fellow Hellenes, throughout
the Republic are aware of Saheti and associate themselves with
this wonderful organisation.

Costa Tomazos - thank you for enriching our Saheti. Thank you
for this wonderful gesture, this contribution which is so important
both for the schooling of our children and at the same time for
contributing to the growth and stature of Saheti. This is an
indication of the great spirit and character of our Costa Tomazos.
Thank you.

Mr. Kokkoris, to you and your P.T.A. Committee, congratulations.
You have again rendered a wonderful service and may you continue
to fulfil your ambitions as Chairman and Committee for the benefit
of one and all.

Saheti has been blessed with wonderful donors and friends. The Ladies Committee, both past and presently led by Mrs. Makrides, who have contributed hundreds of thousands of rand as a result of their activities. A lot of good friends, who are no longer with us, among whom I must mention the names of Mr. Spiro Plomaritis, Mr. Theodosios Deliyiannis, Mr. Periclis Valassis and many others who did so much whilst alive for this wonderful institution.

Kontogiannis, Gents & Many others

Mr. Cosma Cavaleros, for his contribution of another important sector of our school, namely the Computer Centre.

Naturally, Mr. Grabbia who donated R100 000 from which the Media Centre was equipped and the balance going towards the Science

Laboratory. Thank you. You are not Greek but circumstances are

such that you have to be a good Greek neighbour of the Greeks, *and I think their are so many friends who will be it come to your school for*
Mr. Grabbia - how warm and sincere. *Baron & Barones* May your children's wellbeing and education be your reward.

It is wonderful how Saheti has progressed under the able leadership of Mr. George Bizos. Words cannot thank him but I am certain when he sees the wonderful gestures and contributions that are made, such as this Science Laboratory this evening, he feels that his efforts are rewarded.

However, Ladies and Gentlemen, an institution such as Saheti, is a live organisation that never ceases to present challenges to its friends and those concerned with the wellbeing of our children. Saheti is going to be an ongoing challenge - but indeed a privilege and an honour to be able to meet these challenges. Childrens education is creative and demanding - it is not a canned product.

No sooner has Saheti been presented with this Science Laboratory by Mr. Costa Tomazos and his colleagues, that we are immediately faced with another task. What is the task? What are we going to do about furnishing the Laboratory? I do not think that we would like to see

this Laboratory standing vacant until such time as we collect funds to purchase the equipment. What is going to happen to our children's Science education in the interim?

It is certain that it is not beyond our means this evening to commit ourselves to the purchasing of the equipment. Let us not shirk our responsibility - this has never been the spirit of any one concerned with Saheti. Let us commit ourselves this evening, so that the children may enjoy the immediate benefits of this wonderful Science Laboratory and at the same time enable the children that are to follow to also enjoy the benefits of this Laboratory. Let us not delay - let us act now.

Let us create a physical Science Laboratory Equipment Programme chain. I want to refer to it as the Science Laboratory Equipment Programme.

Mr. Kokkoris and members of his Committee are here to assist. They are looking for an amount of R150 000 to R200 000 committed over a period - if it suits you - so that the necessary equipment that is shown and listed here this evening can be purchased. Remember that I do not want you to shy away from small amounts. It is this link that will help to create the eventual Science Laboratory Equipment chain. The listed items make it easy for us to see what is needed.

The Equipment is on show.
Let us make it easy. Look at your friends on either side of you - create a chain - each one of you is a link - arrange among yourselves what contribution you will make - either as an individual or as a group. Let me give you a few moments.

Good
Naturally, if there are one or two people that are willing to commit themselves to the larger amount that is to give us the major portion, I am certain that the rest of us will be able to provide the minor links to complete the cycle. Let us all participate as a unit in order to furnish this Science Laboratory

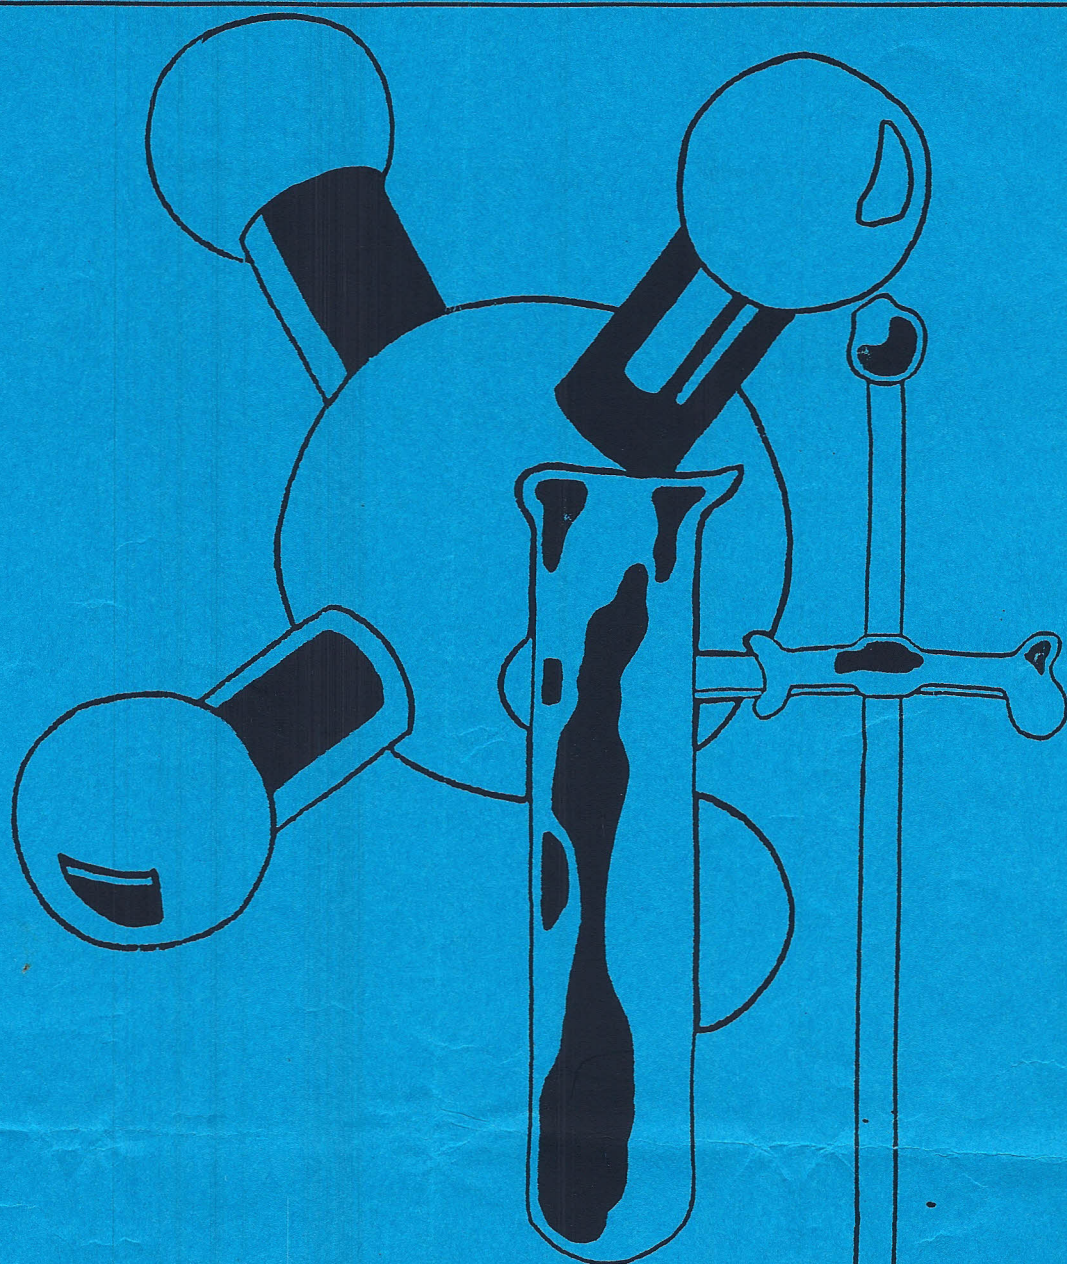

this evening. Let us bring this evening to a wonderful end by rewarding the efforts and gestures of Mr. Kokkoris, his Committee, Mr. Tomazos by assisting them to now equip this Laboratory.

TAX Deductible

Remember, one of the most important investments to make in your life is by investing in the education of your children and by participating and sharing their educational life with them.

Yes. Participation and contributions by all.

let us complete this programme - Let us become 'ARMCHAIR CHEQUE BOOK' participants by contributing. Let us reward Mr. Kokkoris and his efforts - let us shwon our appreciation to Mr. Tomazos by putting the Laboratory to full use.

THE OPENING OF THE "ΑΠΟΣΤΟΛΟΣ ΧΑΤΖΗΓΙΑΝΝΗΣ" SCIENCE CENTRE

ΤΑ ΕΓΚΑΙΝΙΑ ΤΟΥ ΕΡΓΑΣΤΗΡΙΟΥ
